Education

Dr. A.P.J. Abdul Kalam Technical University *June 2024*
Bachelor of Technology (Information Technology) Uttar Pradesh

Work Experience

Software Developer *January 2024 – Present*
Koshiqa Guragaon, Haryana

- Led development of the Koshiqa mobile app, scaling to 300K+ users with 55K+ daily active users (DAU).
- Built and optimized core modules, including E-commerce, community Feed and chat, Profiles, and leaderboard systems.
- Leveraged advanced techniques including Isolates, dependency injection, Platform channel, Generics, Custom Animations, Code Generation, sophisticated error handling, etc.

Flutter Developer *March 2022 - January 2024*
Employee Forums Mumbai, Maharashtra

- Led a team of developers to build features like real-time chat (WebSockets), social feeds, job portal, and global search.
- Led design and Implemented Bloc architecture, reducing app size by 65% while ensuring maintainability.
- Developed industry-level applications using clean architecture & Bloc state management, boosting performance by 70%.

Software Developer Intern *January 2022 - March 2022*
NeonFlake Remote

- Developed cross-platform features and REST APIs using Flutter, Node.js, and MongoDB.
- Worked with cross-functional teams to deliver user-focused applications.

Projects

AI Feedback Intelligence | Next.js, TypeScript, PostgreSQL, Prisma, ChromaDB, Gemini AI, Tailwind, Recharts

- Developed an end-to-end AI feedback analysis engine using an asynchronous multi-source data pipeline.
- Implemented advanced NLP workflows—including automated sentiment scoring, category tagging, and churn risk detection—using Gemini LLMs.
- Designed a semantic search and clustering engine leveraging ChromaDB vector embeddings to group similar feedback and surface recurring user issues.
- Delivered a comprehensive data visualization interface, providing stakeholders with real-time, actionable insights generated directly from raw unstructured text.

Evika | Python, Flutter, MongoDB, Nodejs, Express, Blockchain, Machine Learning

- Created an event management app with Flutter, using Machine Learning for personalized recommendations and Blockchain for secure transactions. Achieved high efficiency and accuracy.

Custom Portfolio | ReactJs, NodeJs, MongoDB, Express, Vercel

- Engineered a full-stack web app for rapid portfolio deployment, facilitating 10-minute showcases through simplified account creation and admin streamlining.
- Offering an intuitive user interface with 3 customizable templates, users swiftly update resumes within a minute.

Recognition & Certifications

Machine Learning by Standford University | Coursera *August 2022*
Highest Score (District) | CodeOn-22 - IIT Kanpur *December 2022*
2x Certificate of appreciation | RECA *March 2023*

Skills

Languages: C++, Java, Dart, JavaScript, TypeScript, Python
Frameworks & libraries: Flutter, React.js, Next.js, Node.js, Express.js, Django
Databases: MySQL, MongoDB, Firebase, SQLite, Isar
State Management: Getx, Bloc, Mobx, Provider
AI & LLM Engineering: LLMs, Prompt Engineering, RAG (Vector Search, Embeddings), Agentic AI, Multi-Agent Systems, CrewAI
Competative Coding: Leetcode, CodeForces, Codechef (1700 +)
Tools: Docker, Git, GitHub, AWS, Figma, Material UI, Tailwind, Postman
